CURRENT ANTHROPOLOGY is a transnational journal devoted to research on humankind. The journal defines such research in the broadest possible way, to encompass all scholarship on human cultures and on the human or closely related species. It therefore makes a strong commitment to a comprehensive view of anthropology and provides a forum for active scholarly critique as a major means by which to achieve this view. To this end, all major articles undergo the CA☆ treatment: commentators, selected internationally, write critiques that appear in the same issue as the article, along with a reply from the author. The journal also publishes research reports, book reviews, interviews, critical comments, and other anthropological news items.

CURRENT ANTHROPOLOGY hopes to build up a comprehensive anthropology by publishing analytic, theoretical, or synthetic articles that communicate significantly to the largest number of anthropologists and to scholars in related disciplines. One way for articles to achieve this breadth is to span disciplinary and subdisciplinary boundaries. Another way is to provide essential knowledge to anthropologists in the other subdisciplines. The journal will not publish articles incapable of reaching a broad international audience through one means or another.

CURRENT ANTHROPOLOGY, in its very name, makes a commitment to publish articles contributing to current debates in anthropology and related disciplines. Articles should be at the forefront of present-day scholarship and may take controversial positions; they may even be speculative at times, as long as their intention is to bring important questions into scholarly debate.

The Wenner-Gren Foundation for Anthropological Research sponsors CURRENT ANTHROPOLOGY in order to create a worldwide community of scholars that transcends national borders and parochial intellectual orientations. This community of scholars forms the Associates of CURRENT ANTHROPOLOGY, who serve as contributors, commentators, and referees, as well as advisors to the Editor.

CURRENT ANTHROPOLOGY's policy requires the assignment of copyright to the Wenner-Gren Foundation for Anthropological Research for major articles and reports. Although copyright to other contributions remains with their authors, it is understood that, in return for publication, the journal has the nonexclusive right to publish the contribution and the continuing right, without limit, to include the contribution as part of any reprinting of the issue in whole or in part, by any means and in any format, including computer-assisted storage and read-out.

Articles published in CURRENT ANTHROPOLOGY are in the English language only. However, manuscripts may be submitted in other languages, and funds exist for making translations into English. This means that authors need not translate their papers into English before submitting them. It also allows authors to revise their papers, should they be accepted, using languages other than English. Manuscripts submitted for review should not have been previously published in any form or language. Articles must be accompanied by abstracts of 200 words or fewer; articles and reports should also be provided with a list of four keywords by which they may be indexed. One keyword should give the subdisciplinary designation most appropriate to the article, and another should give an appropriate geographical designation. Manuscripts should be double-spaced. References cited should be listed alphabetically, double-spaced, at the end of the paper. Footnotes, numbered in sequence throughout the paper, should be gathered together and typed double-spaced at the end. Acknowledgments, if any, should constitute the first footnote (the identifying number being attached to the title of the paper). Tables should be typed on separate sheets, titled, numbered with arabic numerals, and cited in the text. Figures should also be numbered and cited in the text. Photographs should have glossy finish and high contrast. Drawings should be in india ink on white paper. Legends for all figures should be typed, double-spaced, on a separate sheet of paper. Original photographs, figures, and tables should be submitted only when the manuscript is accepted for publication; for review purposes clear photocopies of these items should be sent. Computer diskettes should also be submitted only once the manuscript is accepted for publication.

Manuscripts may also be submitted by facsimile or through e-mail when postal services are slow or untrustworthy.

CURRENT ANTHROPOLOGY uses in-text citations in the following form: (Sahlins 1961:323). The form for listing of references is as follows:
